

# POTATOES

## GROWERS EAGLE PLUS

GROW FORMULA FOR ALL EARLY -- MIDSUMMER -- LATE TYPE POTATOES.

Potato seed come in different sizes, some just right to plant or the larger potatoes which have to be cut, making sure to have at least 2 good set of eyes if possible. Potatoes should be planted 6 to 8 inches down in holes (that will later become hills) spaces 18-24" from each other and row spacing a 36 - 38 " apart. We have used 4.5 liters of water to carry the product to the plants and you can use any type of sprayer to spray or water the plants. Always water or after a rain apply the mixtures below as to take the plants out of stress. Potatoes grow just like people - Baby - Teen - Adult and need to be feed as such 10-52-17 for the baby, 20-20-20 for the teen and 15-15-30 for the adult follow this simple formula and you will be successful in increasing the number of potatoes, the quality and quantity will increase with uniform sizes.

GROWTH STAGE	PRODUCT	RATE/	COMMENTS
As starter with seed <i>THE BABY</i>	*Eagle Starter 10-52-17 Organican 2-5-2	1 oz /30g 1 oz/30ml in 4.5L/water	• Apply 1/2 to 1 cup mix in the hole, place potato on top of solution, firm and cover Excellent starter.
3 weeks after emergence	*Eagle Starter 10-52-17 Organican 2-5-2	1 Oz /30g 1 Oz/30ml	• Mix in 4.5 liters of water. Apply when sufficient canopy has formed, apply to run off. Helps to establish good roots. Reapply in 7-10 days/ 3 applications of this solution needed.
5 weeks after emergence This is when you will hill potatoes and Claybuster can be side banded see** <i>THE TEEN</i>	Organican 2-5-2 *Eagle 15-15-30 Wetting agent	1 oz /30ml 1 oz /30g in 15 ml	• Mix in 4.5 L water apply mixture to run off leaf canopy. • This is the energy solution to get good growth. Make sure to add 15ml of wetting agent, apply 3 times, 7 days apart.
Before Flowering watch the plants and as bud form this is when to apply	Organican 2-5-2 *Eagle 10-52-17 Wetting Agent	1oz/ 30ml 1 oz / 30g 15 ml	• Mix in 4.5 L Water, apply to leaves to run off, this mixture will aid in the flower set of the potatoes.
Tuber initiation	*Eagle 15-15-30 Organican 2-5-2 Wetting Agent	1 oz / 30g 1 oz /30 ml 15 ml	• Mix in 4.5 L water, apply to leaves (canopy) of potatoes, wet to run off. <b>Apply Peter's Plumper-Upper</b>
Bulking up period  <i>THE ADULT</i>	*Eagle 15-15-30 Organican 2-5-2 Wetting Agent	1 oz / 30 g 1 oz / 30 ml 15 ml	• Mix in 4.5 L water Apply to leaves and canopy of plants to run off. • <b>Repeat in 7- 10 days</b> • <b>Requires at least 5-7 sprays of Peter's Plumper-Upper</b>

### EAGLE MULTI-NUTRIENT FERTILIZERS FOR FOLIAR AND FERTIGATION APPLICATIONS

HIGHLY CONCENTRATED, MULTINUTRIENT CRYSTALLINE FERTILIZER CONTAINS MACRO AND MICRONUTRIENTS.

Boron, Copper, Iron, Zinc, Manganese, Molybdenum. Feeds both the leaf and the roots at the same time.

\*Eagle Rose and Strawberry Starter 10-52-17 Plus Micronutrients. 225 g, 454 g, 2 kg, 25 lb bag see 3256

Promotes root development and plant vigor perfect to side dress and starter.

Organican 2-5-2 Seaweed 500 ml bottle, 1 liter, 4 liter jug see 3249

A natural plant nutrient to supplement all fertilizer programs develops a better tasting potatoes..

\*Peter's Plumper-Upper 15-15-30 Plus Micronutrients 454g, 2 Kg, 25lb bag see 3260

Balances plant vigor and aids plants to size up and mature quicker, bulks up potatoes for more weight.

\*\*Clay Buster An organic soil conditioner that provides calcium complex (tests have confirmed that Claybuster under the potato or side banded is more beneficial for the up take of slow release calcium into the tubers increasing tuber size. 15 Lb bag covers 1000 sq ft see 3274

Copper Spray should be sprayed with the above solutions to prevent early and late blight on Potatoes and when the weather is hot and humid, **tomatoes should be sprayed also as they get same blight see 3353**

Wetting Agent makes water molecules smaller and acts as a sticker so plants can absorb better through the leaves see 3290

Sprayer for easy application of all of the above see 3295
